Python Programming Practice Problems

Assignment-2

1. Write a Python program to check whether a number entered by the user is **positive**.
2. Write a Python program to check whether a number is **even**.
3. Write a Python program to check whether a number is **divisible by 5**.
4. Write a Python program to check whether a person is **eligible to vote** (age ≥ 18).
5. Write a Python program to check whether a number is **greater than 100**.
6. Write a Python program to check whether a number is **even or odd**.
7. Write a Python program to find the **larger of two numbers**.
8. Write a Python program to check whether a number is **positive or negative**.
9. Write a Python program to check whether a student **passed or failed** (pass if marks ≥ 50).
10. Write a Python program to check whether a number is **divisible by 2 or not**.
11. Write a Python program to find the **largest of three numbers**.
12. Write a Python program to assign grades based on marks:
    - A: ≥ 80
    - B: 60–79
    - C: 50–59
    - F: < 50
13. Write a Python program to check whether a number is:
    - positive
    - negative
    - zero
14. Write a Python program that checks whether a given year is **a leap year or not**.
15. Write a Python program to classify a person based on age:
    - Child (<13)
    - Teenager (13–19)
    - Adult (20+)
16. Write a Python program to print numbers from **1 to 10** using a for loop.
17. Write a Python program to print numbers from **1 to 20**.
18. Write a Python program to print **even numbers from 1 to 20**.
19. Write a Python program to print **odd numbers from 1 to 20**.
20. Write a Python program to print the **multiplication table of 5**.
21. Write a Python program to print the **multiplication table of any number entered by the user**.
22. Write a Python program to print numbers from **1 to 10 using a while loop**.

23. Write a Python program to calculate the **sum of numbers from 1 to 10**.
24. Write a Python program to calculate the **sum of the first N natural numbers**.
25. Write a Python program to print numbers **from 10 down to 1**.
26. Write a Python program to **count numbers from 1 to 50 that are divisible by 3**.
27. Write a Python program to **calculate the factorial of a number**.
28. Write a Python program to **calculate the sum of even numbers from 1 to 20**.
29. Write a Python program to **print a star pattern**:

```
*
**
***
****
*****
```

30. Write a Python program to **reverse the digits of a number** (e.g., 123 → 321).
